

AASHUTOSH SONI

Full Stack Developer (MERN) | AI Agent Builder | Technical Trainer

aashutoshsoni2019@gmail.com | +91 9755628076 | Pendra Road, Chhattisgarh, India | linkedin.com/in/aashutosh-soni

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Technical Trainer with an MCA background and 2+ years of hands-on experience building scalable MERN Stack web applications, AI Agents, and AI-integrated products. Delivered a live government application at the National Informatics Centre (NIC) and independently architected a production-grade skill-tracking platform with an AI Career Coach powered by the Gemini API. Strong technical communicator who has trained students across 10+ schools, translating complex engineering concepts into practical, industry-ready skills. Actively seeking a Full Stack Developer role to contribute from day one.

TECHNICAL SKILLS

Frontend: React.js, Hooks, Context API, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Responsive UI/UX Design

Backend: Node.js, Express.js, RESTful APIs, MVC Architecture, JWT Authentication, Middleware

Database & Cloud: MongoDB / MongoDB Atlas, SQL, DBMS, Schema Design & Normalization, Cloudinary, Vercel, Render

AI & Agents: LLM APIs (OpenAI, Gemini, Claude), AI Agent Development, Prompt Engineering, Agentic Workflows, Automation Pipelines

Tools & Core CS: Git & Version Control, Axios, Multer, Postman, Data Structures & Algorithms, OOPs

Soft Skills: Problem Solving, Project Management, Client Communication, Team Leadership

WORK EXPERIENCE

Account Manager & Technical Trainer

Apr 2024 – Mar 2026

- Designed and delivered comprehensive training programs in HTML, CSS, JavaScript, Python, Robotics, and AI to students across 10+ DAV schools, improving practical coding skills and project outcomes.
- Built and deployed multiple AI Agents using LLM APIs (OpenAI, Gemini, Claude) for task automation, intelligent Q&A bots, content generation pipelines, and workflow orchestration.
- Developed production-ready websites using AI-assisted development tools, managing the full workflow from UI design and component generation to live deployment.
- Integrated AI features (chatbots, smart search, dynamic content) into MERN Stack web applications to enhance user experience.
- Managed school-level stakeholder relationships, coordinated bootcamp deployments, and ensured seamless curriculum rollouts across multiple institutions.

Computer Science Lecturer

2023 – 2024

- Taught university-level courses in Database Management Systems (DBMS), SQL, Schema Normalization, and Web Engineering, bridging academic theory with industry practice.
- Conducted practical lab sessions in HTML, CSS, and JavaScript; mentored students in debugging, logic building, and clean code practices.
- Improved student pass rates through structured doubt-clearing sessions and project-based learning approaches.

Full Stack Mobile App Development Intern

Feb 2023 – Jul 2023

- Contributed to the complete product lifecycle (UI design, development, testing, deployment) of "CG Kisan," a live government agricultural mobile application serving farmers across Chhattisgarh.
- Collaborated with senior engineers in Agile sprints; optimized application performance and resolved critical runtime bugs under enterprise-grade quality standards.
- Gained deep experience in government software project lifecycles, strict delivery timelines, and real-world deployment workflows.

KEY PROJECTS

Secure MERN Skill Dashboard with AI Career Coach — Live Project · Self-Initiated

- Architected a robust MVC backend integrated with JWT-based authentication and secure authorization middleware; managed dynamic application state via React Hooks and Context API.
- Integrated the Gemini API (gemini-pro) to build an automated AI Career Coach that parses user-specific skill data into structured prompts and returns actionable technology roadmap suggestions rendered via react-markdown.
- Implemented 60-second request timeout handling for external API streams and optimized error boundaries for network resilience, gracefully handling ECONNABORTED errors and token expiration.
- Designed flexible MongoDB Atlas document schemas for seamless CRUD operations; engineered production-ready file upload streams using Multer and Cloudinary for secure profile image storage.
- Deployed end-to-end on cloud infrastructure, hosting the frontend on Vercel and the server tier on Render, and resolved Cross-Origin Resource Sharing (CORS) configuration for cross-domain requests.
- Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, JWT, Cloudinary, Gemini API, Tailwind CSS, Axios.

AI Agent Development Suite — *Self-Initiated / Codevidhya*

- Designed and deployed multiple AI Agents using OpenAI, Gemini, and Claude APIs for task automation, intelligent Q&A, and multi-step workflow orchestration.
- Built agents covering real-world use cases including customer support bots, content generation pipelines, intelligent data retrieval systems, and automated reporting tools.
- Implemented prompt engineering techniques, memory management, and tool-calling patterns for reliable agent behaviour.

AI-Powered Website Development — *Self-Initiated*

- Developed production-ready websites end-to-end using AI-assisted tools, from component generation and UI design to deployment, significantly reducing build time.
- Integrated intelligent features including AI chatbots, smart search, and dynamic AI-generated content into MERN Stack applications.

CG Kisan Mobile Application — *National Informatics Centre (NIC), Raipur*

- Contributed to frontend interface design and backend service integration for a government-grade production app serving the agricultural sector in Chhattisgarh.
- Delivered within strict enterprise timelines; the application is live and actively used by farming communities.

EDUCATION

Master of Computer Applications (MCA)	2023 74.13%
Bachelor of Computer Applications (BCA)	2021 71.13%

LANGUAGES

English: Professional fluency — spoken, written & technical documentation
Hindi: Native speaker
